We Are Enrobage

Enrobage is a rapidly growing company specialising in the research, manufacturing, and marketing of ready-mix film coating systems, designed to meet the specific needs of the pharmaceutical, nutraceutical, veterinary and ayurvedic industries. With a strong focus on tablet film coating, we are committed to delivering timely supply and consistent quality. Our expert technical team, backed by extensive industry experience, ensures that we meet the unique requirements of our clients across diverse sectors.

Operating under our flagship brand, **Bagecoat™**, we produce ready-to-use film coating materials for various applications, including Normal, Functional and Specialty Products. Our success is driven by our ability to attract, retain and empower top-tier talent, fostering an inclusive and dynamic work environment that values merit, innovation and dedication. At Enrobage, we prioritise quality and regulatory compliance, ensuring that all our formulations are crafted using raw materials that meet or exceed domestic and international standards. We offer comprehensive technical support throughout the product lifecycle, from assisting with new product development to providing after-sales standardisation and troubleshooting on-site and in our application laboratory.

“

Our brand logo, inspired by the vibrant spectrum of the rainbow, symbolises our commitment to diversity, creativity and innovation. From uncoated to coated tablets in all shapes, sizes and colours, we deliver versatile solutions that cater to the evolving needs of the healthcare and pharmaceutical industries. Enrobage continues to drive positive change with unwavering dedication to innovation and excellence.

”

A WHO Compliant manufacturing facility at KALA AMB with specialised machinery and instruments including a computerised colour matching system at our production facilities and Q.C. adhering to the latest technology with GMP, FDA, FSSAI and ISO 9001: 2015 Certified & Drug License as specified by the Himachal Pradesh drug department.

NORMAL FILM COATING

At Enrobage India, we offer a comprehensive range of film coating systems under our brand **Bagecoat™**, catering to both normal and functional coating needs. Our diverse product lineup includes solutions designed for aqueous, organic and hydroalcoholic solvent systems. Customers can rely on our expert guidance to select the ideal product for their specific application, ensuring optimal performance and efficiency.

Product	Description	Reconstitution Level	Average Weight Gain
Enrobage+ Aqua I	Grafted PVA based aqueous system	20%	2.5%
Enrobage+ Aqua II	HPMC based aqueous system	15%	2.5%
Enrobage+ Sol	HPMC Based Organic Solvent System	5%	2.5%
Enrobage+ Universal	HPMC Based Aqueous/Hydroalcoholic Organic Solvent System	Aqueous 11% Organic Solvent 5% Hydroalcoholic 9%	2.5%

Bagecoat™ Enteric offers a range of products tailored for enteric coating systems, suitable for various pharmaceutical solid or oral dosage forms, including tablets, capsules, drug-loaded pellets, granules and herbal or nutraceutical formulations. These coatings provide reliable protection in gastric environments, ensuring optimal drug release.

Our enteric coating solutions are designed to deliver maximum performance and cost efficiency. Bagecoat™ Enteric systems are also available for aqueous enteric film coating of soft gel capsules and targeted colonic delivery. Customers can consult our experts for technical advice on product development and application parameters, ensuring customised solutions that meet their needs.

ENTERIC COATING SYSTEM

Product	Description	Reconstitution Level	Average Weight Gain
Enrobage+ EN SOL	Organic enteric coating system cellulose acetate phthalate(CAP) based	5%	8%
Enrobage+ EN-HPMC	Organic enteric coating system, hydroxy propyl methyl cellulose phthalate based	5%	8%
Enrobage+ EN-I	Organic enteric coating system, based as methacrylic acid, co-polymer type "A" USP/NF	10%	8%
Enrobage+ EN-II	Aqueous enteric coating system based as methacrylic acid, co-polymer type "C" USP/NF	20%	9%

NUTRACEUTICAL COATING SYSTEM

Bagecoat™ Nutra is specifically developed aqueous film coating system-designed for nutraceutical tablets. Free from titanium dioxide (TiO₂) and talcum, this innovative coating is available in transparent, white, and coloured formulations, utilising approved natural colours, lake colours or pearlescent pigments for a visually appealing finish. All ingredients in Bagecoat™ Nutra meet the approved excipient standards for nutraceutical products in compliance with EU guidelines, ensuring safety and regulatory adherence.

Product	Description	Reconstitution Level	Average Weight Gain
Enrobage+ NMS	Organic or hydro-alcoholic Nutraceutical film coating system protects the hygroscopic drug molecule from the atmospheric moisture without affecting the active ingredient	Organic Solvent 5% Hydro-Alcoholic 9%	4%
Enrobage+ NS	HPMC Based Organic Solvent System	5%	2.5%
Enrobage+ NF	HPMC Based Aqueous/Hydroalcoholic Organic Solvent System	Aqueous 11% Organic Solvent 5% Hydroalcoholic 9%	2.5%

Enrobage has developed Bagecoat™ Moistshield, a superior moisture barrier coating system designed for moisture-sensitive drugs. This innovative coating provides enhanced stability and protection for hygroscopic formulations. **Bagecoat™ Moistshield** is available in aqueous, organic, and hydro-alcoholic systems, allowing customers to choose the most suitable option based on their active pharmaceutical ingredients and coating facilities.

MOISTSHIELD

Product	Description	Reconstitution Level	Average Weight Gain
Enrobage+ Moistshield	Organic or hydro-alcoholic film coating system protects the hygroscopic drug molecule from the atmospheric moisture without affecting the active ingredient	Organic Solvent 5% Hydro-Alcoholic 9%	4%
Enrobage+ Aqua Moistshield	The drug molecule form atmospheric moisture without affecting the active ingredient	20%	4%

SUSTAINED RELEASE

Bagecoat™ Sustain-R is specifically designed for the development of sustained-release dosage forms, utilising one or a combination of polymers to achieve the desired release profile through matrix formation. The release profile and process are tailored to the drug's solubility, making Bagecoat™ Sustain-R a fully customised solution for controlled-release formulations.

Product	Description
Enrobage+ Sustained Release	Mixture of different polymers used during the granulation stage to form the matrix with the active ingredient to get the required release pattern.

FLAVOUR COATING

Bagecoat™ Tasty Tab is a specially designed, ready-to-use filmcoating system coating system that effectively masks the unpleasant odour and taste of core products. This one-step solution is compatible with aqueous, organic, and hydroalcoholic solvent systems. A variety of flavours, including Chocolate, Strawberry, Raspberry, Mint, Pineapple, Mango, Orange, and Vanilla, are available to enhance the sensory experience.

Enrobage has developed **Bagecoat™ Seal**, a cost-effective organic coating system designed for enteric products. Applied to active tablets, Bagecoat™ Seal smooths the tablet surface, providing a foundation for enteric coating while also acting as a moisture barrier for hygroscopic drugs. Using Bagecoat™ Seal before enteric coating, not only enhances the efficiency of the process but also reduces overall coating costs.

SEALCOAT

TRANSPARENT COATING

Bagecoat™ Pureview is a transparent film coating system designed as a dry dispersion for polishing both coated and uncoated tablets. Compatible with a variety of solvent systems including organic, hydro-alcoholic and fully aqueous-this product is used at a minimal concentration of just 0.2% to 0.5%. It enhances the shine of tablets while improving their glide, increasing mobility, and reducing the risk of throat sticking. Bagecoat™ Pureview is effective for pharmaceutical, nutraceutical, ayurvedic, and herbal tablets, making it a versatile choice for a range of applications.

Bagecoat™ Pearl is a TiO₂ -free film coating system enhanced with pearlescent pigments, designed to create a distinctive appearance for solid dosage forms. This product combines film coating technology with pearlescent pigments, with or without lake colours, to achieve a bright, lustrous finish on tablets. Compatible with various solvent systems-including organic, hydro-alcoholic, and fully aqueous-Bagecoat™ Pearl is suitable for use on pharmaceutical, nutraceutical, ayurvedic, and herbal tablets.

PEARL COATING

ECHO FROST

Bagecoat™ Frost offers a range of products that deliver both an instant and prolonged cooling sensation, making them easy to swallow or apply to the skin or scalp. This customer-specific formulation is designed for nutraceuticals, herbals, cosmetics, and pharmaceuticals. Bagecoat™ Frost is suitable for various applications, including health supplements, chewing gums, anti-dandruff shampoos, creams, mouth fresheners, shaving creams, toothpaste, prickly heat powders, pain balms, and dry syrups. Our service support is tailored to meet individual customer requirements.

Enrobage offers a range of dry colour blend products under the **Bagecoat™ Blend** name. This range features a combination of basic aluminium lake colours, and we provide customised colour blends tailored to meet our customers' specific requirements-all at competitive prices.

COLORS

INSTANT BIND

Enrobage has developed **Bagecoat™ Instant Bind**, a product designed to enhance performance through its superior binding and disintegration properties. This formulation facilitates tablet disintegration, making active ingredients more readily available for dissolution. Additionally, Instant Bind helps to keep absorbed moisture away from the active ingredients, making it an excellent choice for moisture-sensitive drugs and contributing to longer product stability.
